Pedico is a large shoe shop (approx. 1330 m²) at Scherpenheuvel. At the front is a busy main road, at the back a full view over the magnificent rolling landscape of the Vinkenberg.
It is a building in exposed concrete cast in situ.
The simple basic shape is enlivened by the cleverly conceived addition of four concrete frames. From the inside, these provide a concentrated view of the outside or allow daylight to be admitted from above and from the front.
The surrounding area is planted entirely with sweet-scented lavender.
